Student Hire to Own (H2O) Laptop Program Expression of Interest 2025

The Bentley Park College Hire to Own (H2O) Laptop Program provides eligible students with access to laptops through a flexible payment plan that leads to full ownership. H2O equips students with a powerful tool to enhance their learning and develop digital literacy.

Payment plan options can be spread over a one, two, three or four year period, paid in fortnightly instalments (other payment options may be negotiated). The school retains ownership of the laptop during the payment period, allowing for the installation of essential software, warranty management and internet safety features. The comprehensive package inclusions also include damage protection and a carry case.

Payment plans are preferred through BPoint, and are set up through the College Finance Department. At the end of the agreement when the device is paid in full, the laptop is restored to factory settings and ownership transfers to the student.

If a student leaves the school before the payment term ends, the remaining balance must be settled by last day of enrolment. Parents/carers, students and the school formalise this arrangement through a charter acceptance, to ensure all parties understand their responsibilities.

Benefits of the H2O Program:

- Payment plan options of up to 4 years.
- 4 year ADP insurance and warranty is included in total cost.
- Laptops are commercial-grade devices (Asus rugged laptops), specially designed to withstand the rigours of daily student use.
- Devices will have the Department of Education operating system, which provides the same platform as all other devices in the College.
- Standard education software is pre-installed for students.
- Onsite warranty repairs from the supplier are usually the next business day.
- Loan devices are available where accidental damage and repairs are needed.
- Technical support is given between school hours Monday to Friday, onsite.

Further benefits for students:

- A seamless transition between school and home learning environments.
- Access to digital textbooks and educational software.
- Improved collaboration and engagement in class activities.
- An opportunity to further develop essential digital literacy skills for future success.
